## **Report On Student Induction Program (SIP) 2024-25**

### **Introduction to the College and Departments:**

The Student Induction Program (SIP) was organized in our college from September 4, 2024, to September 13, 2024, to introduce new students to the institution and help them transition smoothly into college life. During this program, students had the opportunity to get to know their respective departments, as well as interact with faculty members from other departments like MCA, Electrical, Civil, Mechanical, and ENTC, fostering a sense of cross-departmental collaboration and community.

### **Interaction with Departmental Faculty and College Events:**

The SIP also aimed to create awareness about various events and clubs hosted by the college, such as the MLSC (Microsoft Learn Student Club) and GDSC (Google Developer Student Club). In addition, students were introduced to the Training and Placement Cell, which plays a vital role in shaping their career paths.

### **Sessions on Well-being and Personal Development:**

Several important sessions were conducted during the program, addressing the holistic development of students. A stress management session helped students learn how to cope with academic pressure and personal challenges. Another session highlighted the importance of yoga, focusing on the health benefits of incorporating yoga into daily routines. Moreover, a thought-provoking session on the impact of social media on youth encouraged students to use social media responsibly while avoiding potential pitfalls.

### **Guided Tour of Departments:**

In alignment with the structured timetable, students were taken on a tour of various departments to familiarize themselves with key areas of the campus and facilities, giving them a better understanding of the learning environment they would be a part of during their time at college.

### **Conclusion:**

The SIP provided an excellent platform for students to learn about the college's academic environment, facilities, and the importance of a balanced approach to education and personal well-being. The program was highly beneficial, equipping students with insights to help them navigate college life successfully.
